

IN THE CLAIMS

Please amend the claims as follows:

Claims 1-50 (Canceled).

Claim 51 (Previously Presented): A recording medium for storing a program executed by a computer on an image input apparatus connected thereto through a transmission line, the program comprising:

creating an image capture guide list which is displayed on a screen of a display device for said image input apparatus, and includes at least one of image titles that represent targets to be recorded and are used for shooting, wherein the creating includes,

reading out a manufacturer's model identifier from said image input apparatus connected to said computer, and

creating the image capture guide list adequate for the model, including,

inputting an image recorded by said image input apparatus based on the image capture guide list and also inputting this image capture guide list;

displaying a spreadsheet input screen consisting of a plurality of cells; and

displaying an image title in the image capture guide list in one of the cells.

Claim 52 (Previously Presented): A recording medium for storing a program executed by a computer on an image input apparatus connected thereto through a transmission line, the program comprising:

creating an image capture guide list which is displayed on a screen of a display device for said image input apparatus, and includes at least one of image titles that represent targets to be recorded and are used for shooting, wherein the creating includes,

reading out a manufacturer's model identifier from the header of the recorded file  
stored in said image input apparatus, and

creating the image capture guide list adequate for the model, including,

inputting an image recorded by said image input apparatus based on the image  
capture guide list and also inputting this image capture guide list;

displaying a spreadsheet input screen consisting of a plurality of cells; and

displaying an image title in the image capture guide list in one of the cells.

Claim 53 (Previously Presented): A recording medium for storing a program executed  
by a computer on an image input apparatus connected thereto through a transmission line, the  
program comprising:

creating an image capture guide list which is displayed on a screen of a display device  
for said image input apparatus, and includes at least one of image titles that represent targets  
to be recorded and are used for shooting, wherein the creating includes,

creating the image capture guide list adequate for each model using a table in which  
model ability information for each model of plural image input apparatuses is registered with  
respect to each of a plurality of manufacturer's model identifiers, including,

inputting an image recorded by said image input apparatus based on the image  
capture guide list and also inputting this image capture guide list;

displaying a spreadsheet input screen consisting of a plurality of cells; and

displaying an image title in the image capture guide list in one of the cells.

Claim 54 (Currently Amended): The [[A]] recording medium for storing a program  
executed by a computer according to claim 51, wherein the creating comprises:

specifying at least one of the cell positions where image titles have been input; and  
creating an image capture guide list including the image title(s) on the specified cell  
position(s).

Claim 55 (Previously Presented): A recording medium for storing a program executed  
by a computer according to claim 51, wherein the creating comprises:

inputting a shooting instruction item for each image title in respective cells on the  
input screen;

specifying at least one of the cell positions where image titles have been input; and  
creating an image capture guide list including the image title(s) in the specified cell  
positions and the shooting instruction item(s) for the image titles.

Claim 56 (Previously Presented): A recording medium for storing a program executed  
by a computer according to Claim 51, wherein the creating comprises:

changing the size of at least a part of the cells on the input screen;  
specifying at least one of the cell positions where image titles have been input;  
specifying a cell position, in which an image is to be pasted, for each image title; and  
creating an image capture guide list including the image title(s) in the specified cell  
position(s) and the size(s) of the specified cell(s).

Claim 57 (Previously Presented): A recording medium for storing a program executed  
by a computer according to Claim 51, wherein the creating comprises:

changing the size of at least a part of the cells on the input screen;  
pasting an image in one of the cells;

specifying at least one of the cell positions where image titles have been input;  
specifying a cell position on which an image has been pasted for each image title; and  
creating an image capture guide list including the image title(s) in the specified cell position(s) and the size(s) of the image(s) pasted on the specified cell(s).

Claim 58 (Previously Presented): A recording medium for storing a program executed by a computer on an image input apparatus connected thereto through a transmission line, the program comprising:

creating an image capture guide list which is displayed on a screen of a display device for said image input apparatus, and includes at least one of image titles that represent targets to be recorded and are used for shooting;

inputting an image recorded by said image input apparatus based on the image capture guide list and also inputting this image capture guide list;

displaying a spreadsheet input screen consisting of a plurality of cells; and

displaying an image title in the image capture guide list in one of the cells, reading out the size of a target cell in which the image recorded for the image title is to be pasted, changing the size of the recorded image to the size of a read-out cell, and pasting the recorded image in the target cell.

Claim 59 (Previously Presented): The recording medium for storing a program executed by a computer according to claim 58, wherein the pasting includes changing the size of an image to the changed size of a cell if the size of the cell, in which the image has been pasted, is changed.

Claim 60 (Canceled).

Claim 61 (Previously Presented): A recording medium for storing a program executed by a computer according to Claim 51, wherein the image capture guide list includes the manufacturer's model identifier.

Claim 62 (Previously Presented): A recording medium for storing a program executed by a computer according to Claim 52, wherein the image capture guide list includes the manufacturer's model identifier.

Claim 63 (Previously Presented): A recording medium for storing a program executed by a computer according to Claim 53, wherein the image capture guide list includes the manufacturer's model identifier.
